

## KEMLUX A & B TANKS

Introducing the final two tanks in the Kemlux III product line. With this launch of the Kemlux III A and B tank sizes we now have the complete Kemlux III line.

The Kemlux III line now covers almost any Classified Division 2 application. The A and B tanks both use medium based HID lamps from 35w to 175w high pressure sodium and pulse start metal halide. The A tanks use the same optics as the C tanks with a 5.5" optic thread while the B tanks use the same optics as the D tanks with an 8" optic thread.

Utilize the Kemlux matrix below depicting how these five different tanks relate. The Kemlux "family tree" on the back illustrates the variety of mounts, tanks, optics, guards and reflectors available for diverse applications.

## FEATURES & BENEFITS

- Seven different mounts for application flexibility
- Five different tanks optimized for eight sources
- Glass refractors in Type I, III and V distributions
- Special non-glass food optic
- Class I, Div 2 photocontrols for energy savings
- Full cut-off optics for IDA Dark Sky approval
- Made in USA, ARRA compliant
